Inera Announces eXtyles and eXtyles SI for Word 2007

Newton, MA, USA — August 3, 2007. Inera Inc., the leading provider of editorial and XML production software for the publishing industry, today announced *eXtyles* and *eXtyles SI* for Word 2007.

eXtyles is an integrated suite of tools for Microsoft Word that automates editorial and XML production processes. It streamlines cleanup of Word documents into a standard editorial and visual style and enables export of valid XML according to the National Library of Medicine (NLM) DTD directly from Microsoft Word. The Scientific, Technical, and Medical (STM) extensions to *eXtyles* include sophisticated heuristic processes to automatically edit and validate references and citations in scholarly content.

eXtyles SI automates most *eXtyles* functions by running unattended on Microsoft Windows 2003 Server with Microsoft Internet Information Services.

eXtyles and *eXtyles SI* automate many of the time-consuming tasks faced by editors, allowing them to focus on content and work more efficiently. These products provide a bridge between editorial departments, who need easy-to-use tools, and production departments, who increasingly need XML for web and print production. “With *eXtyles*, we saw a quick and substantial return on our investment,” said Anne Vinnicombe, Vice President of Production and Electronic Publishing, Thieme Publishers. “We’ve not only saved time and improved the quality of our publications — we’ve also significantly cut our production costs.”

With the release of *eXtyles* and *eXtyles SI* for Word 2007, the *eXtyles* product family adds support for the most significant release of Microsoft Office in more than a decade. “The new Math Editor and XML file format in Word 2007 bring new opportunities for scholarly publishers,” noted Inera CEO Bruce Rosenblum. “This update to *eXtyles* will be an important part of the workflow for publishers who wish to leverage these features.”

eXtyles and *eXtyles SI* for Word 2007 will be available on September 1, 2007.

About Inera Inc. — Since 1992, Inera (<http://www.inera.com>) has focused on supplying sophisticated editorial and production solutions to the publishing industry. Inera's *eXtyles*[®] product family provides integrated tools for Microsoft Word and content management systems that automate editorial, reference linking, and XML production processes. *eXtyles* products are used in the production of over six hundred prestigious journals worldwide.
