

The Year in eXtyles

Elizabeth Blake
Director of Business Development

The third virtual XUG

- We had originally planned an in-person meeting this year
 - We opted to keep it virtual for a few reasons
 - Poll results from XUG attendees influenced our decision
- Will future meetings be virtual or in person?
 - Short answer: probably both?
 - More to come on this topic, but rest assured we'll keep you in the loop and solicit your feedback

Inera in the cloud

- Inera turned 30 in 2022!
 - From a small office in Newton...
 - To a larger one in Belmont...
 - To the Wiley Medford offices in... March of 2020
- The Medford office closed in May of this year
 - Our physical infrastructure is now in New Jersey
 - Inera is now 100% virtual (and fewer than half of us are in Boston)

eXtyles[®] in 2022

eXtyles stats

- As of mid-September, 129 new items in our master eXtyles release notes since XUG 2021
 - ~38% of those were general improvements to eXtyles
 - ~62% were customer-specific improvements
 - 9 items were bug fixes
- Fewer changes overall than in previous years, but the percentages are remarkably consistent

eXtypes development priorities

- Development encompasses traditional eXtypes adjustments and work on the entire product family, including cloud solutions (**stay tuned for Bill's talk tomorrow!**)
- eXtypes gets regular physicals, but this year its check-up has been more thorough
- We've been focusing resources on ensuring the technology will continue to thrive

eXtyles infrastructure

- Reviews of
 - the entire eXtyles architecture, top to bottom
 - our deployment and delivery processes
- Revisions to
 - our automated testing mechanisms
 - the eXtyles installation architecture
 - hardware key requirements (we're phasing them out, yay!)
- Integrating with our parent company while ensuring we continue to provide reliable service to you

Release notes highlights

eXtyles Improvements

- >2200 new titles in the journal database
- Improved handling of nested tables at Activation and Cleanup
- Improved recognition of document elements such as
 - unnumbered object citations
 - access dates in references
 - resubmission dates
 - title case surname prefixes

Release notes highlights

eXtyles and the publishing ecosystem

- Added support for BITS 2.1, which includes improvements requested by eXtyles customers (**stay tuned for Debbie's talk later today!**)
- Expanded support for identification of citations to datasets submitted to DataCite
- Updated export and deposit modules to support new JATS4R recommendations and PubMed requirements
- Improved ORCID merge behavior

Edifix 2.0 API

The Edifix 2.0 API was released in January with lots of improvements and new features – see the [Edifix blog](#) for more details

The screenshot shows a web browser displaying a blog post. At the top left is the logo for 'THE edifix BLOG'. To the right is a navigation menu with links: '← Edifix Home', 'Features', 'Solutions', 'Pricing', 'Resources', and 'Contact Us' with a RSS icon. The date 'March 14, 2022' is displayed above the article title 'Introducing Edifix API 2.0'. The main text of the article begins with 'March 14, 2022, Medford, MA—Inera, an Atypon company and the leading provider of editorial and XML software for scholarly, technical, and standards publishers, today announced the release of the Edifix API, version 2.0.' The text continues to describe the software's capabilities. On the right side of the page, there is a 'Tweets from @Edifix' widget showing a tweet from Edifix (@Edifix) dated Oct 4, which promotes a '#WordTip' in a newsletter and includes a link 'ow.ly/PHF350KXiXh'. Below the tweet is a graphic with the text 'Word Tips' and a large letter 'W'.

The background features a stylized world map on the left side, rendered in a darker blue shade against a lighter blue background. To the right of the map, there are several concentric, light blue circles that create a sense of depth and focus towards the central text.

eXtyles[®] and Office

eXtyles support for 64-bit Office

- Part of the infrastructure initiative
- Has positioned us to be much more responsive with future updates but has taken far longer than anticipated to complete
- **Phased rollout will begin on November 30**
- Going forward, eXtyles will auto-detect whether your version of Word is 32- or 64-bit at installation
- We will eventually phase out support for 32-bit Office, but that will not happen for *at least* a year (and we will provide ample notice)

eXtyles and Word “modern comments”

- Recently introduced into O365 to allow for more extensive collaboration
- Removed ability to use Word character styles in comment text, which is a key feature of eXtyles Reference Correction
- For now, the best workaround is to
 - copy and paste the corrected text
 - strip the <jrn> tags
 - rerun Bibliographic Reference Processing
- We’ve reached out to Microsoft
- Technical bulletin and/or FAQ to come

eXtyles PubMed Reference Correction

eXtyles has not updated this reference because the article title in PubMed significantly differs from the author's original. The PubMed reference is Müller O, Becher H, van Zweeden AB, Ye Y, Diallo DA, Konate AT, et al. Effect of zinc supplementation on malaria and other causes of morbidity in west African children: randomised double-blind placebo-controlled trial. BMJ. 2001 Jun 30;322(7302):1567. (Ref. 12 "Müller, Becher, van Zweeden, Ye, Diallo, Konate, et al., 2001")¶

The background features a stylized world map in shades of blue on the left side, with concentric white circles radiating from the center of the map across the entire blue background.

WILEY ■ Partner Solutions

What is Partner Solutions?

- A new division within Wiley Research
 - Operating separately from the publishing division
 - Following the same security and privacy protocols that have been in place since the acquisition of Atypon in 2016
- **Comprised of trusted brands and expert teams working collaboratively to help publishers solve key challenges**
- Brands include Inera as well as Atypon, eJournalPress, J&J Editorial, Knowledge Unlatched, and Madgex

What does this mean for you?

- No change to your use of eXtyles or your relationship with our team
- Opportunities to benefit from Inera's position within a broader network of publishing expertise
 - Collaborative and innovative solutions and services
 - Access to a wider range of resources and events

Our Solutions

Publishing Solutions

INERA

Editorial and XML solutions to drive multi-format publishing.

- Journals: meet the needs of journal editors, authors, reviewers, and readers
- Standards: solutions for national standards bodies
- Books: XML workflows specifically targeted for scholarly books

Partner Solutions collaboration: Inera and J&J

- J&J Editorial provides editorial, production, and consulting services
- Acquired by Wiley in October 2021
- Opportunities to work together and provide creative joint solutions arose very quickly
 - **More on this partnership later today from J&J!**
 - A great collaboration for organizations who want the many benefits of an eXtyles workflow but don't want to run the software themselves

Other Partner Solutions collaborations

- Atypon and AAAS
 - Collaboration highlighted at Atypon's recent community meeting
 - With AAAS XML generated by eXtyles, the process to identify, communicate, and execute adjustments required for the migration to Literatum was simplified
- eJournalPress
 - Facilitating workflow efficiencies for shared customers
 - Exploring various opportunities for integration with EJP and JPS

Remember when I said no change to your use of eXtyles or your relationship with us?

- That's still true!
- However, a heads up: “new” email addresses for our team are probable
 - Inera staff already have three email addresses (which means many of us also have multiple inboxes, multiple calendars, etc...)
 - We love our @inera.com identities, but something's got to give 😊
 - **Ultimately, a consolidation will ensure more efficient and reliable communication**

Speaking of communication...

- You'll likely see some cosmetic changes in the coming year (e.g., website design and newsletter adjustments)
- We'll also keep you in the loop on initiatives and events we think will be relevant to you
- Sylvia Izzo Hunter and Jo Ripoll have moved into broader roles within the Partner Solutions marketing team
 - Those of you who are Atypon customers may have already benefited from their work on Atypon newsletters, blogs, and community meetings
 - Still working with Inera while also serving a broader team of colleagues and customers

Thank you and stay tuned!
