Industry Updates & Meeting Wrap-up

Bruce Rosenblum
CEO

JATS

- ▶ JATS 1.2d2 is now available
 - ▷ Lots of incremental improvements
 - ▷ https://groups.niso.org/apps/group_public/download.php/20333/NISO-JATS-1-1-to-1-2.pdf
- ▶ JATS 1.2 going to NISO vote late 2018

BITS/STS

- ▶ BITS 2.0
 - ▷ Stable in 2018
 - ▷ Growing adoption

- ▶ NISO STS 1.0
 - ▷ Stable in 2018
 - ▷ Growing adoption
 - ▷ Moving to NISO Continuous Maintenance (like JATS)

JATS/BITS/STS Future

- ▶ JATS Compatibility Meta Model
 - ▷ <https://www.ncbi.nlm.nih.gov/books/NBK425547/>
 - ▷ <https://www.ncbi.nlm.nih.gov/books/NBK425698/>
- ▶ Goals
 - ▷ Thoughtful alignment
 - ▷ Thoughtful growth
 - ▷ Thoughtful third party customization
- ▶ Future Discussion: When might it be ok to break backwards compatibility?
 - ▷ Note: No current plans to break backwards compatibility

New(ish) NISO Projects: JATS4R

- ▶ JATS for Reuse is devoted to optimizing reusability of scholarly content by developing best-practice JATS tagging recommendations
- ▶ Proposal to become NISO Recommended Practice
- ▶ Learn more: <https://jats4r.org/>

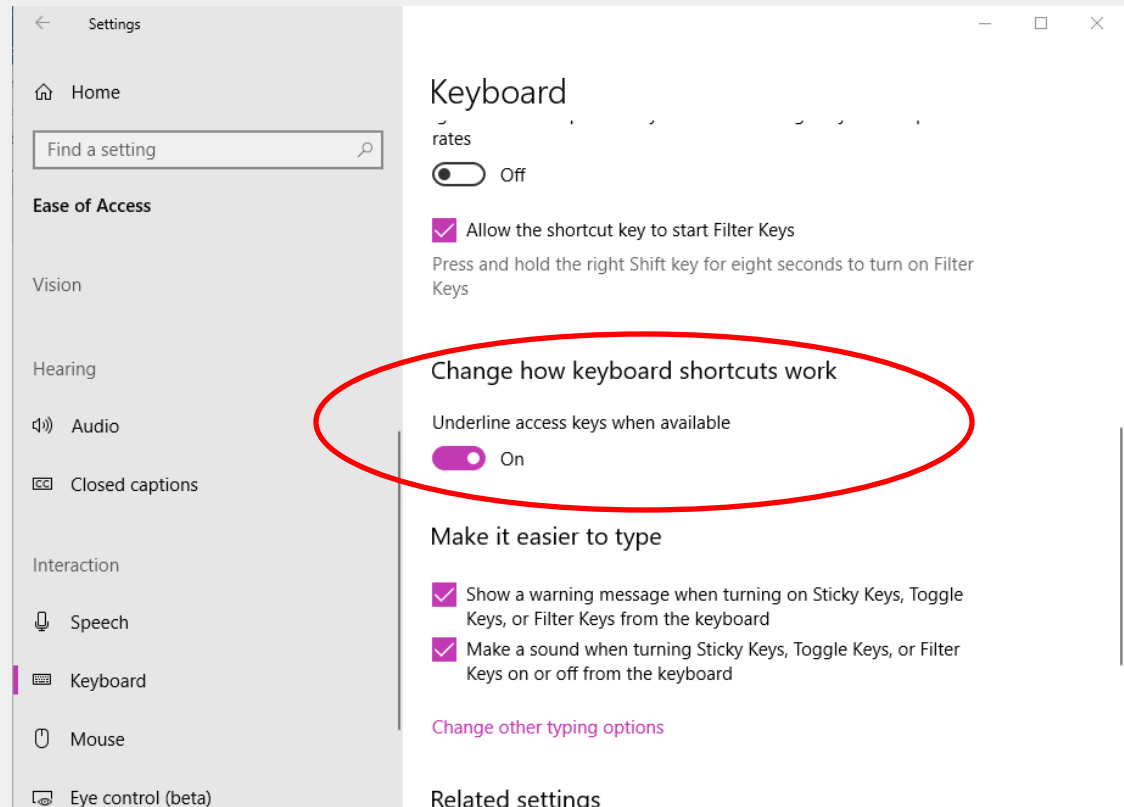

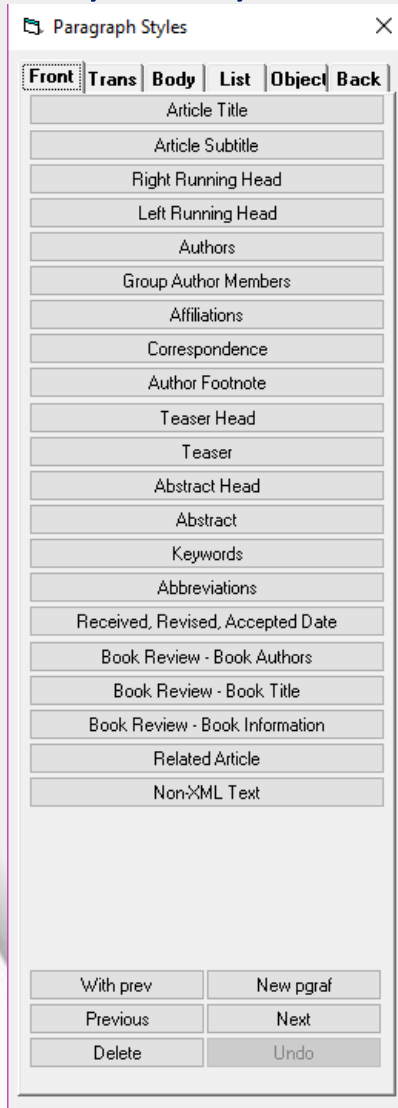

New NISO Projects: MECA

- ▶ Manuscript Exchange Common Approach
- ▶ Transfer manuscripts and peer review information between platforms (peer review and preprint)
- ▶ Key supporters: Aries, Clarivate, eJournalPress, Highwire, PLoS
- ▶ Learn more:
 - ▷ <https://www.manuscriptexchange.org/>
 - ▷ <https://scholarlykitchen.sspnet.org/2018/07/25/guest-post-manuscript-exchange-meca-can-academic-publishing-world-cant/>

Partners

- ▶ No Technology is an Island
- ▶ Our job is to stay ahead of technology changes so you can do your job!
- ▶ Working with partners:
 - ▷ Microsoft
 - ▷ PubMed
 - ▷ Crossref
 - ▷ MathType

► Mystery of the disappearing hot keys

PubMed

- ▶ 2016: http → https
- ▶ 2018: API Keys
 - ▷ Required to query PubMed > 3 queries/sec.
 - ▷ eXtyles PubMed rate: ~7 queries/sec.
 - ▷ Original go-live: 1 May 2018
 - ▷ Actual go-live: 1 December 2018
 - ▷ Patches available since mid-September
 - ▷ Design at PubMed took several iterations
 - ▷ Effects NCBI linking, too
 - ▷ Inera investment: >250 person-hours

Crossref

- ▶ 100,000,000 DOIs
- ▶ Crossref Metadata Check
 - ▷ Focus on completeness, not quality
 - ▷ New emphasis on citations
- ▶ Common Crossref metadata errors
 - ▷ Incomplete records (no volume, issue, page)
 - ▷ Incorrect tagging of article ID
 - ▷ Full journal name in <abbrev_title>
 - ▷ Incorrect special character encoding

MathType

- ▶ Purchased by Wiris, September 2017
- ▶ Mac version, December 2017
- ▶ Windows 7.0, March 2018
- ▶ Windows 7.1, April 2018
 - ▷ Mostly eXtyles compatible
- ▶ Windows 7.3, August 2018
 - ▷ Current version: 7.3.1.438
 - ▷ Inera in process of full compatibility testing
- ▶ Monthly updates

Unicode 10

- ▶ Released June 5, 2018
 - ▷ 684 new characters (including 66 emoji)
 - ▷ 137,374 total characters
- ▶ Seven new scripts
- ▶ Example new emoji

- ▶ <http://unicode.org/versions/Unicode11.0.0/>

Retraction Database

- ▶ Retraction Watch database
 - ▷ Searchable database
 - ▷ <http://retractiondatabase.org/RetractionSearch.aspx?&AspxAutoDetectCookieSupport=1>
 - ▷ More extensive than PubMed or Crossref
 - ▷ >18,000 retracted papers and conference abstracts
- ▶ If you are interested in eXtyle querying this database, contact us

Retraction Data

- ▶ Science Article
 - ▷ <https://www.sciencemag.org/news/2018/10/what-massive-database-retracted-papers-reveals-about-science-publishing-s-death-penalty>
- ▶ Notable findings
 - ▷ Absolute number of annual retractions has grown, but the rate of increase has slowed
 - ▷ Much of the rise appears to reflect improved oversight at a growing number of journals
 - ▷ Relatively few authors are responsible for a disproportionate number of retractions

Industry Update QuickPoll (1)

- ▶ Who is (still) using?
 - ▷ Word 2010 or earlier
 - ▷ Windows 7 or 8.x
 - ▷ Any NLM DTD before JATS 1.0
 - ▷ NLM Book

- ▶ Who is currently using?
 - ▷ Word 2013
 - ▷ Word 2016
 - ▷ Windows 10

Industry Update QuickPoll (2)

- ▶ In 2019, will your organization adopt?
 - ▷ JATS 1.2
 - ▷ BITS 2.0
 - ▷ ORCID
 - ▷ CRediT
 - ▷ Windows 10
 - ▷ Office 2016

Future Opportunities and Challenges

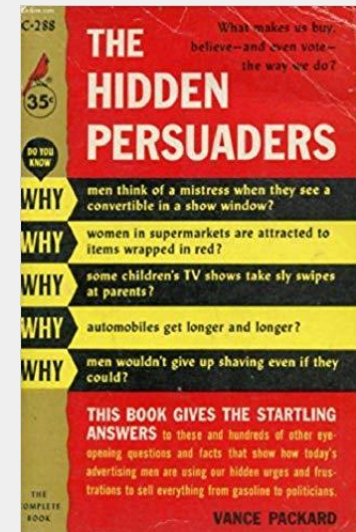

- ▶ Open Access
- ▶ Media Literacy and Trust
- ▶ Artificial Intelligence

Open Access

- ▶ Ever newer public mandates
 - ▷ Option “S”
 - ▷ California Taxpayer Access to Publicly Funded Research Act
- ▶ ...bring new approaches
 - ▷ 10,000+ hybrid journals
 - ▷ “mirror” journals
- ▶ ...and will bring ongoing challenges
 - ▷ Complex multi-party agreements and requirements
 - ▷ Migration from subscriptions to open access
 - ▷ Predatory publications – Cabell’s Blacklist > 10,000

Media Literacy & Trust

- ▶ 1957: Cost to “publish” and “distribute” was expensive
- ▶ Only organizations with significant resources could publish to an audience of size

Media Literacy & Trust

- ▶ 2018: Marginal cost to “publish” and “distribute” has gone down
 - ▷ Anyone can put up a website
 - ▷ Anyone can claim to do peer review
- ▶ How do you teach “media literacy”
 - ▷ Interpretation
 - ▷ Trust
- ▶ When information is global, how do you establish trust, especially across cultures?

AI Hype

- ▶ “Working together, we can out-think anything”

AI Reality

- ▶ <https://www.technologyreview.com/s/609048/the-seven-deadly-sins-of-ai-predictions/>
- ▶ “Almost all innovations in robotics and AI take far, far, longer to be really widely deployed than people in the field and outside the field imagine.”

AI Failures

- ▶ eXtyles Arc, version 0.3
- ▶ STM Publisher Site Index
 - ▷ “Pure AI approach”
 - ▷ Needed “good, neutral data to train”
 - ▷ Too much manual labor to adjust
 - ▷ Never released to production
- ▶ Uber self-driving AZ car crash

Recent WSJ Articles on AI

- ▶ Christopher Mims
 - ▷ <https://www.wsj.com/search/term.html?KEYWORDS=Christopher%20Mims>
- ▶ “Should Artificial Intelligence Copy the Human Brain?”
- ▶ “Driverless Hype Collides With Merciless Reality”
- ▶ “The Key to Autonomous Driving? An Impossibly Perfect Map”
- ▶ “The Global Tech Backlash Is Just Beginning”

Bruce's Thoughts on AI

- ▶ AI is a tool, not a solution
 - ▷ AI can't make nuanced decisions
 - ▷ AI can't solve all problems
 - ▷ AI is only as good as the data used to train it
- ▶ AI can provide people with more intelligent choices

Conclusions

- ▶ Publishing is more complex than ever
- ▶ Consuming information is *also* more complex than ever
- ▶ AI will create as many problems as it solves

Thank you
